

Spin at UCF

Whether you're driving on campus and hunting for parking, or making the 20 minute trek on foot to class or work, as a University community member, you can skip the hassles and still get to where you're going with Spin.

What is Spin? How does it work?

Spin operates electric scooters on campuses and in cities, bringing sustainable last-mile mobility solutions to diverse communities. Spin has partnered closely with facilities, transportation & parking, campus police, student life, and sustainability to bring a dockless mobility option to UCF in a responsible and carefully orchestrated manner, tailored to meet the needs of students, faculty, and staff alike.

At Spin, we give you the freedom to move. Scan the QR code below to download the app. Create your account, navigate to the nearest scooter, scan the code, and you'll be on your way! UCF's program is designed to best preserve campus aesthetics, while also providing extensive program access. Follow the safety rules below, respect your fellow community members when riding, and enjoy the ride!

First time? Start slow on a quiet street before kicking it up a notch. Always wear a helmet.

Ride in the bike lane or street. Share sidewalks and multi-use pathways with pedestrians.

Obey local traffic laws and always yield to pedestrians. One rider per vehicle and riders must be 18+. Ride sober.

Always park scooters responsibly and in designated areas or Hubs. Avoid blocking sidewalks and never park in ADA spaces.

Download the app and sign up with your .edu email to enjoy discounted rides. Take our safety quiz to earn \$5 in ride credit and helmet.
